

SOLAR 2006

July 8-13, 2006 Denver, Colorado

The theme of SOLAR 2006 is "Renewable Energy: Key to Climate Recovery." SOLAR 2006 will focus on the large contribution renewable energy and energy efficiency technologies. The conference will bring together decision-makers, researchers, inventors, designers, builders, advocates and policy-makers. The meeting will include plenary sessions, forums, technical sessions, workshops, tours, social events and a renewable energy products and services exhibit.
